DEVANSH SINGH RAGHUVANSHI

Jangpura, New Delhi, India

linkedin | **+91-9140405360** | **dsraghuvanshi2002@gmail.com**

Education

Chandigarh University — June 2021 - May 2025
Bachelor of Engineering in Computer Science and Engineering — **CGPA: 8.28/10**

Varanasi Public School Varanasi — Apr 2019 - Mar 2020
Senior Secondary (Class XII) — **Percentage: 84.00**

Varanasi Public School Varanasi — Apr 2017 - Mar 2018
Matriculation (Class X) — **Percentage: 93.00**

Professional Summary

Computer Science Engineering graduate with an ongoing AI/ML DevOps internship at NeGD, MeitY. Skilled in Python, SQL, Git/GitHub, Linux, AI/ML, and software development fundamentals, with project experience in machine learning, NLP, and data processing. Strong problem-solving skills with a keen interest in Python-based development, automation, and emerging AI technologies.

Internship Experience

National e-Governance Division (NeGD), MeitY — AI/ML & DevOps Intern | New Delhi, India — Aug 2026 - Present

- Working on the myScheme Government of India project with exposure to AI/ML and software development activities.
- Working with the myScheme MongoDB data dump for database exploration, queries, and data analysis.
- Assisting in AI/ML chatbot development for the myScheme application and understanding related workflows.
- Developed OneClickCreate for automated meeting scheduling and invitations using Python and FastAPI.
- Built SpeakDocs using FastAPI and React, integrating Voice AI, OCR, hybrid search and RAG-based document Q&A.

Venura Tech — AI & Machine Learning Intern — May 2026 - June 2026

- Gained practical exposure to AI/ML concepts and Python programming through structured technical training.
- Developed understanding of Machine Learning and Deep Learning techniques through practical learning activities.
- Worked with Python for data analysis, visualization, and basic machine learning workflows.
- Gained exposure to AI model training and evaluation using relevant concepts and techniques.
- Developed understanding of real-world AI applications through practical exercises and project-based learning.

Project

Customer Churn Prediction — Machine Learning

- Developed a Python-based churn prediction model using LightGBM, XGBoost CatBoost on 10K+ records.
- Performed data preprocessing, feature engineering, and validation using Pandas and Scikit-learn.
- Optimized model performance using GridSearchCV, improving accuracy by 6.2 percentage points.
- Analyzed 50,000+ customer records to identify key factors influencing customer churn.
- Used Matplotlib for exploratory data analysis and visualization of customer behavior patterns.

Technical Skills and Tools

- Programming — **Python, SQL, Bash/Shell Scripting**
- AI/ML — **Machine Learning, NLP, Model Training & Evaluation, Scikit-learn**
- Agentic Development — **Cursor, Claude Code, OpenAI Codex, GitHub Copilot, AI Agents, Prompt Engineering**
- Data & Analytics — **Pandas, NumPy, Matplotlib, EDA, Data Processing**
- Backend Development — **REST APIs, Flask, FastAPI, JSON, HTTP/HTTPS**
- Software Development — **OOP, DSA, SDLC, Debugging, Testing**
- Databases — **SQL, Oracle SQL, MongoDB, Relational NoSQL Database Concepts**
- Version Control — **Git, GitHub**
- DevOps — **Linux/Unix, Docker, CI/CD Fundamentals, DevOps Concepts, Deployment Workflows**
- Soft Skills — **Analytical Thinking, Problem-Solving, Attention to Detail, Team Collaboration**

Certifications

- **IBM DevOps and Software Engineering**
- **Google AWS Cloud Solutions Architect**
