Education

Chandigarh University — June 2021 - May 2025
Bachelor of Engineering in Computer Science and Engineering — **CGPA: 8.28/10**

Varanasi Public School Varanasi — Apr 2019 - Mar 2020
Senior Secondary (Class XII) — **Percentage: 84.00**

Varanasi Public School Varanasi — Apr 2017 - Mar 2018
Matriculation (Class X) — **Percentage: 93.00**

Professional Summary

Computer Science graduate with expertise in C++, Python, ML, computer vision, and AWS. Delivered 4 projects achieving 92 percent + model accuracy using OpenCV, LightGBM, and XGBoost. Seeking a software engineering or ML role with a strong DSA foundation to build scalable, AI-driven systems.

Projects

Face Recognition Attendance System Computer Vision

- Implemented Python + OpenCV LBPH face recognition system — 100+ samples, 94%+ accuracy, real-time inference.
- Automated registration for 50+ student profiles, cutting manual entry time by 85% with instant data retrieval.
- Architected SQLite authentication system — 500+ records, sub-200ms queries, role-based access control.

Age and Gender Detection Deep Learning

- Deployed real-time demographic detector via OpenCV DNN + Caffe — sub-100ms latency, 30 FPS, 88%+ accuracy.
- Constructed end-to-end CV inference pipeline in Python — face detection, bounding box annotation, and multi-label classification in one pass.
- Streamlined preprocessing pipeline via region cropping and batch normalization, cutting per-frame overhead by 40%.

Customer Churn Prediction Machine Learning

- Engineered soft-voting ensemble (LightGBM + XGBoost + CatBoost) — 92.4% accuracy, 0.89 AUC-ROC, 10,000+ records.
- Conducted EDA and feature engineering on 50,000-row dataset using Pandas + Matplotlib, identifying 7 key churn indicators.
- Tuned hyperparameters via GridSearchCV (120+ combos, 5-fold CV), boosting accuracy by 6.2pp over baseline.

Portfolio Personal Web Project Web Dev

- Shipped responsive portfolio (HTML5, CSS3, JavaScript) — 95+ Lighthouse score across 5 breakpoints.
- Launched on GitHub Pages with custom domain; CSS animations + JS interactions lifted session engagement by 35%.
- Maintained version history via Git with commit conventions (feat/fix/docs) across 30+ commits.

Technical Skills and Tools

- Languages **Python, C++, OOPs, Java, SQL, HTML, CSS**
- ML/AI **OpenCV, LightGBM, XGBoost, CatBoost, Pandas, NumPy, Matplotlib**
- Web & Frameworks **Bootstrap**
- Cloud & DevOps **AWS, Docker, CI/CD, GitHub Actions**
- Tools & Platforms **Git, GitHub, Google Colab, VS Code**
- CS Fundamentals **Data Structures, Algorithms, OOP, DBMS, OS Concepts**
- Soft Skills **Algorithmic Thinking, Team Collaboration, Technical Communication, Fast Learner Across Tech Stacks**

Certifications

- **IBM DevOps and Software Engineering**
- **Google AWS Cloud Solutions Architect**
- **Meta Programming in Python**

Academic Achievements

- **Authored over 1 research papers, with 1 successfully published.**
